NON CREDIT MANDATORY COURSE CERTIFICATE

This is to certify that the Non Credit Mandatory Course (NCMC)- National Service Scheme (NSS)- BNSK659 has been successfully carried out by **Boosi Reddy Prasad Reddy** bearing USN **1RN23CI039** Bonafide student of **RNS Institute of Technology** in partial fulfillment of the requirements for the award of degree of **Bachelor of Engineering in** Dept. of **Computer Science & Engineering (AIML)** of **Visvesvaraya Technological University, Belagavi** during 2025-26. It is certified that all corrections/suggestions indicated for Internal Assessment have been incorporated in the report. The **NON-CREDIT MANDATORY COURSE- National Service Scheme (NSS)- BNSK659** report has been approved as it satisfies the academic requirements in respect of NCMC for the said degree.

DECLARATION

I, **Boosi Reddy Prasad Reddy** bearing the USN **1RN23CI039**, student of **Bachelor of Engineering** in Dept. of **Computer Science & Engineering (AI&ML)** at RNS Institute of Technology, Bengaluru, hereby declare that the **Non Credit Mandatory Course (NCMC)- National Service Scheme (NSS)** work has been carried out by me under the supervision and guidance of Department Staff Coordinators submitted by me as a partial fulfillment for the award of Bachelor of Engineering degree in **Computer Science & Engineering (AI&ML)** from Visvesvaraya Technological University, Belagavi during 2025-26. I also declare that, this work has not been submitted previously for the award of any degree or diploma, by me, to any institution.

Boosi Reddy Prasad Reddy

1RN23CI039

ACKNOWLEDGEMENT

I want to profoundly thank the Management of **RNS Institute of Technology** for providing me such a healthy environment for the pursuing this work.

I am thankful to **Dr. Ramesh Babu H S**, Principal, RNS Institute of Technology for providing me excellent facilities for carrying out this programme.

I express my thanks to **Dr. Andhe Pallavi, Professor. & Head, Dept. of CSE (AI&ML)** for her valuable support.

I am also grateful to NCMC Department coordinator **Apoorva MS**, Dept. of CSE(AI&ML) during the execution of NCMC activity. I express my thanks to **Dr. Vijaykumar G**, Assistant Professor Dept. of mechanical engineering, NSS Officer and **Mr. Sachin R Kulkarni**, Assistant Prof, Dept. of Civil Engg., RNSIT for their valuable guidance, suggestions, and cheerful encouragement during the **NCMC - NSS.**

Finally, I take this opportunity to extend my gratitude and respect to my parents, teaching and non-teaching staff of the Department and all my friends who have directly or indirectly supported me during the period of my NCMC activity.

Boosi Reddy Prasad Reddy

Table of Contents
(As per 6th semester NSS Scheme Syllabus)

Sl. No.	Chapter Name	Page No.
1	Plantation and adoption of plants. Know your plants.	1
2	Digital India for National Integration and Social Harmony: Awareness & Empowerment Program	2-4
3	Govt. school Rejuvenation and helping them to achieve good infrastructure.	5-6
4	NSS Activity-1.	7-8
5	NSS Activity-2.	9-10

Chapter 1

Plantation and adoption of plants

1.1 Introduction

The mango (Mangifera indica) is a popular tropical fruit known for its sweet taste and vibrant color. Originating in South Asia, it is now grown globally, especially in tropical regions. Beyond its culinary use, the mango has cultural, medicinal, and symbolic significance.

1.2 Plant's Origin

Mangoes originated in South Asia, particularly India, Myanmar, and Bangladesh. Cultivated for over 4,000 years, they spread to Southeast Asia, Africa, and the Americas. India remains the largest producer, followed by countries like China and Thailand.

1.3 Usage in Daily Life and Medicinal Uses

Daily Life: Mangoes are enjoyed fresh, in smoothies, salads, and savory dishes like curries. Medicinal Uses: Mangoes are rich in vitamins and antioxidants, supporting immune health, digestion, and skin. Their anti-inflammatory properties help with conditions like arthritis. Mangoes, leaves, and bark are also used in traditional medicine for various ailments.

1.4 Symbolism in Folklore and Literature about Mango

Mango is sacred, associated with wealth and divine favor. The fruit appears in literature as a symbol of sensuality and paradise, often celebrated during "mango season" in festivals. The mango tree is also viewed as a symbol of life and protection. Together, we dug a hole, placed the young plant carefully, and filled it with soil, ensuring it was secure

Chapter 2

Digital India for National Integration and Social Harmony: Awareness & Empowerment Program

National integration is the psychological, social, and economic architecture that binds citizens into a cohesive whole, transcending regional, linguistic, and cultural boundaries. To move beyond superficial engagement, your programs must prioritize **active empathy** and **shared utility**.

1. Core Objectives: The "Bridge-Building" Strategy

- **Deconstructing Stereotypes:** Creating safe spaces for individuals from different backgrounds to debunk biases through direct, guided interaction.
- **Shared Economic Prosperity:** Leveraging digital infrastructure as an equalizer. When individuals access the same services (banking, government portals, education) regardless of their location, the sense of a "unified national identity" strengthens.
- **Inclusive Narratives:** Moving from a "majority-minority" framework to a "shared citizen" framework, where the contribution of every region is recognized as vital to the national tapestry.

2. Enhanced Event Framework: Deep-Dive Implementation

Workshop 1: "The Digital Bridge – Access for All"

Concept: This workshop moves beyond technical literacy to focus on "Digital Equity." It addresses the digital divide by showcasing how digital identification and payment infrastructure (e.g., UPI, DigiLocker, Aadhaar) act as the backbone of modern citizenship.

Expanded Agenda:

- **The "Equalizer" Seminar:** A session explaining how digital platforms remove the "middleman" in government services, reducing corruption and regional bias.

- **Peer-to-Peer Mentoring:** Younger, tech-savvy participants (youth volunteers) are paired with elders or residents from underserved areas. They help them register for services or learn to use banking apps. This creates a bond of trust across generational and social lines.
- **Live Case Study:** Invite a local entrepreneur who utilized digital tools to scale their business beyond their district. Seeing real-world success inspires others and demonstrates the power of a connected nation.

Outcome: Participants move from "feeling left behind" to "feeling connected" to the national grid.

Workshop 2: "The Unity in Diversity Forum"

Concept: This is a shift from a standard seminar to a "Human Library" and Cultural Exchange. The goal is to make the "other" familiar and relatable through personal storytelling.

Expanded Agenda:

- **The Human Library:** Instead of books, participants "borrow" people. A person from a different region sits for 20 minutes to share their life experiences, challenges, and traditions. This builds deep empathy and humanizes cultural differences.
- **Collaborative Innovation Challenge:** Divide participants into mixed teams (people from different districts/backgrounds). Give them a "problem statement" to solve (e.g., "How can we make our city cleaner?" or "How do we bridge the rural-urban gap in our town?").
- **The "Common Heritage" Exhibit:** A display showing historical or cultural elements shared by different regions, emphasizing that our roots are often more intertwined than we realize.

Outcome: Participants replace abstract labels with personal memories and relationships, fostering a sense of shared citizenship.

3. Sustainability and "The Multiplier Effect"

One-off events are often forgotten quickly. To ensure long-term impact, implement these sustainability strategies:

- **The "Buddy System":** At the end of every workshop, pair participants from different backgrounds. They must commit to a "follow-up interaction" (a phone call or a virtual coffee) once a month for the next six months.
- **Digital Storytelling:** Create a shared social media group or digital community for all past participants. Use this to share successes, local news, and collaborative projects, keeping the "National Integration" conversation alive daily.
- **Institutional Partnerships:** Partner with local schools, colleges, and libraries to make these workshops recurring. An annual "Unity Day" hosted at a school creates a ripple effect, teaching children the values of harmony early on.

Chapter 3

Govt. school Rejuvenation and helping them to achieve good infrastructure.

Rejuvenation is more than just a fresh coat of paint; it is about creating an environment that inspires learning.

1. The Assessment Phase (The "Audit")

Before spending, conduct a thorough audit with the school administration, teachers, and student representatives. Categorize needs into:

- **Structural Safety:** Roof integrity, electrical wiring, and sanitation facilities.
- **Functional Needs:** Desk and chair ratios, library books, and blackboard quality.
- **Environment:** Playground cleanliness, garden areas, and wall aesthetics.

2. Strategic Pillars of Rejuvenation

- **Sanitation & Hygiene:** This is the #1 priority. Functional, clean, and gender-segregated toilets are non-negotiable for student retention, especially for girls.
- **Learning Spaces:**
    - **The Library:** A "reading corner" can change the culture of a school.
    - **Visual Learning:** Convert dull walls into "learning walls" (e.g., painting math formulas, maps, or historical timelines directly on the walls).
- **Technology Integration:** If infrastructure allows, set up a basic computer lab or a digital projector space for e-learning materials.

3. Sustainable Execution Roadmap

- **Community Partnership:** Do not just "do it for them." Involve the local community, parents, and alumni. When parents help paint the school, they take ownership of its maintenance.
- **The "Maintenance" Fund:** Often, infrastructure is built but decays due to lack of upkeep. Establish a simple committee consisting of 1 teacher, 1 parent, and 1 student to oversee the condition of the facilities monthly.
- **Crowdsourcing & CSR:** Approach local businesses for CSR (Corporate Social Responsibility) funding specifically for durable assets like water purifiers, solar panels, or playground equipment.

4. Impact Measurement

Success should not be measured just by the money spent, but by:

1. **Attendance Trends:** Does the improved environment correlate with fewer student absences?
2. **Student Feedback:** Are the students proud to attend their school?
3. **Sanitation Utilization:** A significant increase in the usage and cleanliness maintenance of restrooms.

Chapter 4

NSS Activity-1.

Swatch Bharat

1.1 Introduction

As part of the National Service Scheme (NSS) activities, a cleanliness drive was conducted under the Swachh Bharat Abhiyan to promote awareness about hygiene and sanitation.

Volunteers actively participated in cleaning public spaces such as school premises, streets, and community areas. Awareness rallies and poster campaigns were also organized to encourage proper waste disposal and discourage open defecation. The drive witnessed enthusiastic participation from students, staff, and local residents, creating a collective sense of responsibility. Pamphlets and banners were distributed to spread the message effectively across the community.

In addition, NSS volunteers conducted door-to-door interactions to educate residents about the importance of maintaining cleanliness in their surroundings. Sessions on waste segregation, composting, and reduction of single-use plastic were held to promote sustainable practices. Interactive activities like quiz competitions and street plays were also conducted to engage youth and children.

The initiative aimed not only at improving physical cleanliness but also at instilling a sense of civic duty and environmental responsibility among the participants and the community.

Feedback from the locals indicated increased awareness and willingness to adopt cleaner practices in daily life.

1.2 The 5 R's of Waste Management

1. Refuse: Avoid products that generate waste, such as single-use plastics.
2. Reduce: Minimize waste production by using fewer resources.
3. Reuse: Extend the life of products by using them multiple times.
4. Repurpose: Give old items a new life by transforming them into something useful.
5. Recycle: Convert waste materials into new products to reduce the need for raw materials.

1.3. Garbage Collection in Gram Panchayaths

Swachh Bharat Mission (Gramin): This mission requires every Gram Panchayat to put in place a functional waste management system. The Village Water and Sanitation Committee (VWSC) is appointed as the executive authority to plan, collect, treat, and dispose of kitchen wastes and other domestic waste generated by households.

Chapter 5

NSS Activity-2.

World Earth Week: Our Power, Our Planet

World Earth Day, observed annually on April 22, is the largest civic environmental movement in the world. It serves as a global call to action, reminding us that the health of our planet is intrinsically linked to the health, stability, and future of humanity.

The Significance of Earth Day

Born in 1970, Earth Day originated as a grassroots effort to push for environmental protections in the United States, which led to landmark legislation like the Clean Air Act and the establishment of the Environmental Protection Agency (EPA). Today, it is celebrated in over 190 countries, evolving into a pivotal moment for demanding policy change, fostering education, and mobilizing community-led solutions for a sustainable future.

Earth Day 2026 Theme: "Our Power, Our Planet"

The theme for 2026, "Our Power, Our Planet," emphasizes that environmental progress does not depend on any single election or administration. Instead, it is sustained by the collective, daily actions of individuals, communities, and local institutions. It shifts the narrative from waiting for top-down mandates to recognizing that grassroots mobilization—when scaled—drives markets, influences policy, and ensures long-term ecological resilience.

Why This Movement Matters

As we navigate 2026, the challenges are clear: climate instability, plastic pollution, biodiversity loss, and resource scarcity are no longer distant threats but present realities. Earth Day is essential because it:

Humanizes Statistics: It transforms abstract climate data into tangible stories of community impact.

Fosters Accountability: It provides a platform to hold both corporations and policymakers accountable for their environmental footprints.

Promotes Collective Action: It connects isolated local efforts (cleanups, tree plantings, policy advocacy) into a unified global force.

How You Can Take Action

Every individual has the power to contribute to a healthier planet. Here is how you can move from awareness to action:

Support Clean Energy: Advocate for and adopt renewable energy sources in your home or workplace to reduce reliance on fossil fuels.

Educate Others: Use your influence to spread accurate environmental knowledge, helping to debunk myths and encourage sustainable habits among your peers.

Final Thought: Environmental progress is not a destination but a continuous process. By recognizing that our actions have power, we can ensure that Earth remains a resilient, thriving home for generations to come.
